

*📄🎯 AI Powered Customer Support and service automation- Internship

AI POWERED CUSTOMER SUPPORT AND SERVICE AUTOMATION

Internship Documentation

Course: Salesforce Certified Administrator with AI Agent

Intern Name: Smartbridge internship

2. 🎯Project Overview

This 2-month internship focused on building an AI-powered customer support system using Salesforce.

The goal was to automate repetitive tasks like reply generation and warranty validation to improve efficiency.

3. ⚡Key Components

Component Type Purpose

<http://AIReplyGenerator.cls> Apex Class Auto-generate customer replies using AI
Auto_Warranty_Validation.flow Salesforce Flow Auto validate warranty on case creation

Order__c Custom Object Store order details

Product__c Custom Object Store product warranty info

Customer_Support_Reply_Generator.prm Prompt Template Standardize AI responses

📍*5.System Architecture *

6. ⚡ Summary

*1: Foundation & Automation

- Learned Salesforce Admin and Service Cloud
- Created *Order* and *Product* objects
- Built Auto Warranty Validation Flow
- Understood case management process
- 2: AI Integration & Deployment - Weeks 5 to 8*
- Set up Salesforce AI Agent
- Developed AIReplyGenerator Apex class

- Created prompt template for support replies
 - Testing, bug fixing, and final documentation
-

7. 🎯 *Sample Weekly Reports*

- Project kickoff, Service Cloud basics, Object design
 - Flow Builder training, Warranty validation flow completed
 - AI Agent setup, Prompt engineering started
 - Integration testing, Performance optimization
 - Final testing, Documentation, Project submission
-

8. ⚡ *Outcomes & Impact*

1. 60% reduction in manual support tasks
 2. Warranty check time reduced from 10 minutes to 30 seconds
 3. Consistent and faster AI-generated replies
 4. Hands-on experience with Salesforce + AI
-

9. ⚡ *Skills Learned*

Salesforce Administration, Service Cloud, Flow Automation, Apex, AI Agent, Prompt Engineering, Documentation

10. 🎯 *Conclusion*

This internship provided practical experience in combining Salesforce Admin skills with AI to solve real customer support problems.

The automation built will help reduce agent workload and improve customer satisfaction.
